been enclosed in sleeves, including sleeves having perforations such that a portion of the sleeve can be torn away, and that wall paper has been flocked to provide the three-dimensional patterns. However, Applicant is not aware of any prior art, including the listed patents which disclose, teach or even suggest a method for providing a decorative cover about a floral grouping, comprising: providing a sheet of material having a three-dimensional printed pattern thereon wherein the three-dimensional pattern is produced by application of a foamable ink composition to the sheet of material; providing a floral grouping having a bloom end and a stem end; and wrapping the sheet of material having the three-dimensional pattern printed thereon about the floral grouping to provide the decorative cover for the floral grouping.

Applicant also admits that flower pots containing live or artificial plants, have been wrapped in the past with floral paper having a printed design; that such flower pots have been enclosed in sleeves, including sleeves having perforations such that a portion of the sleeve can be torn away, and that wall paper has been flocked to provide a three-dimensional patterns. However, Applicant is not aware of any prior art, including the listed patents, which discloses, teaches or even suggests a method for forming a preformed pot cover for a flower pot, by: providing a flower pot; providing a sheet of material having a three-dimensional printed pattern thereon wherein the three-dimensional pattern is produced by application of a foamable ink composition to the sheet of material; forming the sheet of material into the preformed pot cover comprising a base and a skirt; and positioning the flower pot in the pot receiving space of the preformed pot cover leaving the open upper end substantially uncovered.

Applicant admits that decorative grass and packing materials have heretofore been made of paper and polymeric materials which are shredded and cut into segments.
